MATHAN RAJ M

9514256024   mathanraj7200@gmail.com

Objective

To attain a challenging position where I can effectively contribute my skills as a software professional.

PROJECT EXPERIRNCES

Company: klixtech
Duration: 6 Months
Role: Software Developer
Project: Billing Software (Online and Offline Support)
Description:
- Developed and maintained a billing software solution with both online and offline functionality.
- Built front-end user interfaces using Angular, enabling dynamic and responsive user experiences.
- Integrated Diaxe IndexDB for offline data storage and automatic synchronization once online.
- Implemented CRT (Customer Receipt Token) code system for secure receipt generation and streamlined billing operations.
- Developed RESTful APIs using Spring Boot to handle backend logic, including CRT code validation and transaction storage.
- Collaborated with backend services to ensure data consistency across offline and online modes.
- Optimized application performance and ensured cross-browser compatibility.

Technologies Used: Angular, Diaxe IndexDB, Spring Boot, REST APIs, MySQL, HTML, CSS, JavaScript
